Vo Đinh Quoc Bao

Backend Developer

Phone: (+84) 372 783 767

Email: quocbao201104@gmail.com

Website: https://baodev.me

Github: https://github.com/quocbao201104

Address: Tan Binh Dist, Ho Chi Minh City

OBJECTIVE

Short-term: Seeking a Backend Developer Intern / Fresher Node.js position to build secure and high-performance RESTful APIs with Node.js and MySQL.
Long-term: To grow into a backend engineer capable of designing scalable, reliable, and secure systems.

EDUCATION

2022 - Present

Van Hien University

Major: Information Technology

Specialization: Information Security

WORK EXPERIENCE

7/2025 - Present

PERSONAL PROJECT: ONLINE STORY READING AND AUDIO PLATFORM

TruyenVietHay – Backend Developer

- Designed and developed the backend for an online story reading and audio platform using Node.js, Express, and MySQL.
- Built RESTful APIs for stories, chapters, reading history, audio playlists, comments, ratings, and follow features.
- Implemented authentication and authorization with JWT, Google OAuth, and RBAC for Admin, Author, and User roles.
- Optimized content delivery by separating chapter metadata in the API and serving chapter/audio assets through CDN / object storage, reducing backend load and improving scalability.
- Integrated Redis and Socket.io for caching, real-time notifications, chat, and online presence.
- Developed background jobs with cron to handle statistics aggregation, rankings, data cleanup, and gamification reward lifecycle tasks.
- Designed database schemas and optimized MySQL queries for high-traffic features such as chapter reading, reading history, comments, and rankings.
- Production system: https://truyenviethay.id.vn/ | Source code: Private repository

SKILLS

Languages:	JavaScript (ES6+), TypeScript.
Backend:	Node.js, Express.js, RESTful API, JWT, RBAC, Google OAuth, Socket.io
Database:	MySQL, Redis.
Tools & Others:	Git, Postman, Cloudinary, AWS S3 / Cloudflare R2, Cron jobs
